

Oink: Pioneering AI Agent-Powered Worlds to Redefine Meme Coin World Building

Abstract

Oink is the world's first meme coin to pioneer a network of AI-driven agentic characters that dynamically evolve within a cohesive social layer, shaped by narrative-driven storytelling and immersive world building. By merging creative internet culture with advanced artificial intelligence, Oink delivers a living, breathing digital experience where engaging characters, compelling stories, and vibrant community participation redefine the possibilities of meme coins.

Introduction

Meme coins thrive on fun, relatability, and broad community participation. Oink builds on these foundations by deploying intelligent AI agents as core participants in the ecosystem. Each character interacts in real time with both users and each other, shaping storylines, discussions, and engagement across Oink's social channels.

A New Standard in Meme Coins

- **Agentic AI:** Instead of static characters or one-off gimmicks, Oink's AI agents enhance the user experience with evolving personalities, dynamic conversations, and real agent driven utility. These agents function within a social graph of connections encompassing friends, family and other characters, who interact with each other and evolve based on current events in the Oink universe. We call this the "Agentic Social Layer".
-

Vision

Oink envisions a future where meme culture meets AI innovation, a place where the community are no longer just spectators but active co-creators in an ever-evolving narrative. Through continuous upgrades to its AI-driven infrastructure, Oink empowers the community to engage in meaningful, interactive experiences while driving new dimensions of storytelling and creativity. With a commitment to staying fresh and adaptable, Oink aims to deliver long-lasting value and inspire a new standard for innovation in the crypto space.

Key Differentiators

1. World-First AI-Driven Agentic Social Layer

- **Ai Social Layer:** Characters from the universe of Oink are represented as AI agents that adapt their dialogues, goals, and group dynamics as the community grows and as the core story progresses through traditional storytelling mediums.
- **In-House AI Infrastructure:** Unlike projects relying on no-code agent launchpads, Oink's infrastructure is developed, hosted, and deployed in-house by our core team. This ensures full adaptability, allowing Oink to continuously innovate without external limitations and remain at the forefront of AI-driven social experiences.

2. Community-Inspired Growth

- **Interactive Content:** Meme creation contests, polls, lore expansions, and direct interaction with the agentic social layer ensure participants directly shape Oink's digital culture.
 - **Inclusive Engagement:** Core AI interactions and the agentic social layer are designed to be accessible to all community members, fostering widespread participation and collaborative growth.
-

Tokenomics

- **Token Name:** Oink
- **Ticker:** \$OINK
- **Blockchain:** Solana (SPL Token)
- **Total Supply:** 69,420,000,000 \$OINK
- **Allocation:**
 - **Liquidity Pool (50%)**
 - **Investor Seed (10%)**
 - **Marketing (10%)**
 - **Content (10%)**
 - **Ecosystem (10%)**
 - **Treasury (10%)**

All mint and freeze authorities have been revoked upon launch, ensuring trustless supply. Managed funds will be subject to a highly secure multi-signature custody procedure amongst core team members, strictly adhering to our treasury management policies in alignment with the project roadmap and vision, and in support of the long-term health of the project.

Roadmap

Phase 1 (Q1 2025)

- \$OINK Launch: Initial DEX listing with robust liquidity.
- AI Agents v1: First iteration of the interactive AI agent driven social layer,
- Establish social channels for community growth and engagement (Telegram, X, etc.).
- Release website
- Engage with industry as part of targeted marketing campaign to drive meme recognition and adoption
- Begin production of high quality short form content to be published on short form video mediums such as Instagram and Tiktok, driving new community growth and brand awareness.

Phase 2 (Q2 2025)

- AI Agents v2: Begin continuous development on the agentic layer, providing additional utility to our network of agents. Examples of potential capabilities include automated trading, autonomous asset generation and management, and market research.
- Begin outreach for CEX listings to increase liquidity and user base.
- Release trailer and the first long-form animated installment of the main story

Phase 3 (Q3 2025)

- Further agentic ecosystem development
- Partnerships with AI innovators or meme-based communities for cross-promotion.
- Begin regularly releasing new long form animated installments, driving forward the Oink narrative universe reflecting to the evolving behavior and interactions of the agentic social layer.

Phase 4 (Q4 2025 & Beyond)

Oink will focus on scaling its impact by expanding the possibilities of its AI ecosystem, building toward a future where its agents can power entirely new interactive experiences across industries. The long-term vision includes pioneering applications in storytelling, entertainment, and other innovative spaces yet to emerge. By leaving room for continuous evolution and integration with future technologies, Oink is designed to remain adaptable and visionary, ensuring its relevance and growth for years to come.

Conclusion

Oink reimagines meme coin world building by introducing a first-of-its-kind AI-driven social and utility layer that makes every user a participant in its evolving digital culture. Combining creative storytelling, dynamic social engagement, and continuously upgraded technology, Oink delivers an experience that goes beyond mere speculation. Join us to witness how we are breaking the mold and setting a new standard for memes in the ever-evolving crypto ecosystem.
